

## SUPRA FLAT 2X1.6

Flat Loudspeaker Cable

Gauge: 2x1.6mm<sup>2</sup> / AWG 15

Rev.date: 2022-08-30

Customs tariff no: 8544499390

Country of origin: Sweden

- Super-thin, thickness of 1.95 mm
- Paintable & possible to cover under wall paper
- Double sided self adhesive tape included
- Tin plated - Anti-corrosive and prevents skin-effect

### Flat 2x1.6 - Super flat speaker cable

A super-thin, just 1.95 mm thickness, with tin plated and mangled 5N copper braid, which allows for virtually invisible wiring. The cable attaches to most surfaces by using Supra double sided self adhesive tape. The big advantage is in practice almost invisible installation, making e.g. rear speakers cables disappear in a lavish living room. It is possible to paint and to wall paper this cable. The sound will likely to be perceived close to Supra Classic, a warmer sound due to slightly elevated inductans compared to our pure Hifi cables. Thanks to its tin plating, skin-effekt is well controlled and inductans not overly evident.

- Super thin - Discreet cable location on-wall and e.g. under carpets.
- Insulation - Easy to strip, paintable and possible to hide under wall paper.
- Tin plated - Anti-corrosive and prevents skin-effect and phase alternating diode effects.
- Flexible - Easy to install
- Terminals - Do not require terminals other than for convenience.
- Double sided self adhesive tape included

### CONSTRUCTION

Conductors (x2):	Tin plated Cu-braid 12x8x0.15 mm
Diameter:	0.8 mm
Cross section Area:	2x1.6mm <sup>2</sup> / AWG 15
Insulation:	PVC GA78, flat-model
Insulation thickness:	0.7 mm
Diameter:	1.95x11.7 mm
Colour:	White (other colours upon order)
Marking:	SUPRA FLAT 1.6 + Made in Sweden + Meter mark
Weight:	54 kg/km
Packing:	Bobbin 200m (other lengths upon order) Blister packs of 10m & 20m incl tape

### ELECTRICAL SPECIFICATION

Resistance:	10.8 ohm/km
Inductance:	0.45 uH/m
Rated voltage:	80V
