

AV-6.4 A/V Cable

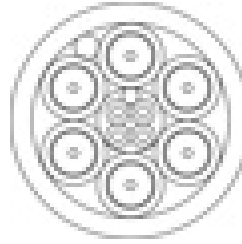

Multi-Core Coaxial Cables for Audio/Video

Gauge: 6x0.2mm² / AWG 24

Rev. date: 2026-06-16

Customs tariff no: 8544499500

Country of origin: Sweden

- Multiple individually screened 75-ohm coaxial cores
- Ultra-low capacitance PE foam insulation
- Excellent shielding against RF and electromagnetic interference

Supra AV Series – Professional Audio/Video Transmission

The Supra AV Series is designed for high-performance home theater and professional audio/video installations. Featuring multiple 75-ohm coaxial cores with tin-plated OFC braided shielding, the cable ensures accurate signal transmission with minimal interference.

The PE foam insulation provides ultra-low capacitance for clear and distortion-free signal transfer, making the cable suitable for high-resolution video and multi-channel audio applications.

Short timing deviation of less than 2.2 ns enables precise RGB and high-resolution video transmission.

CONSTRUCTION

Coaxial design:	6 individually shielded 75-ohm coaxial cores + screened 2-pair audio cable
Cross-sectional area:	0.2 mm ² / AWG 24
Shield:	Alu/PET foil and braid
Number of channels:	6
Polarity identification:	Black, Blue, Green, Red, White, Yellow
Colour:	Ice Blue
Packaging:	100 m bobbin
