### Cat 8 STP FRHF Patchkablage

Supra Cat 8 offers future-proof networking by handling 40GBASE-T over a single cable! Furthermore, it is backward compatible with the Cat 6A standard. Supra Cat 8 patch cables are fitted with our improved RJ45 connector to keep up with the increased speed. From Cat 6A, the speed is four times higher in Cat 8 with its bandwidth of 2000 MHz! Better than category "8.2" according to the specification IEC 61156-10, excellent NEXT, low attenuation, great shielding for lowest level of interference (double shielded, each pair and common) and low timing errors (jitter). The patch cords are high pressure machine pressed & each cable is tested 2 times before packaging, made in Ljungskile, Sweden.

Supra is considered as a trustworthy and responsible partner for installations in public and official premises. We meet the latest regulation of flame retardancy and toxic emissions.

Fire behavior: DCA, Smoke protection: s1, Flaming droplets: d1, Reaction to fire classification: Dca-s1, d1
