SUPRA Fork XL

24K gold-plated Fork XL connector designed for speaker terminals and other heavy-duty audio connections. The versatile design supports both straight and 90° angled installation, accommodates cable cross-sections up to 10 mm², and allows additional banana plug connection using the supplied adapter (see illustration). Fork XL internal width: 6.5 mm.

Widely recognized and copied worldwide, the original Fork XL remains the preferred choice for superior quality, durability, corrosion resistance and conductivity.

Commonly used in car, caravan and marine audio installations thanks to its corrosion-resistant construction and suitability for confined terminal spaces, while also ideal for a wide range of HiFi and professional audio applications.
