

## SUPRA GROUND PHONO CABLE

Earth connection with spades for Phono/turntable

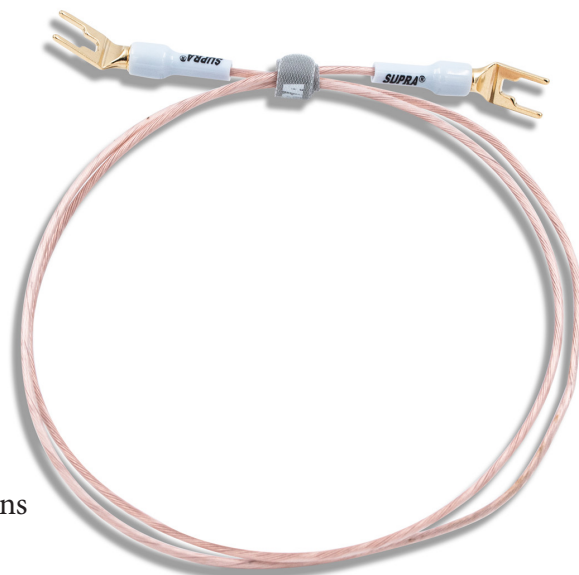

Gauge: 1x1.6mm<sup>2</sup> / AWG 15

Rev.date: 2026-05-08

Customs tariff no: 8544429010

Country of origin: Sweden

- PP-insulated conductors
- Combicon Crimp 24K gold-plated solid OFC plugs
- Spades are standard but you can easily change to banana pins
- Earth Link is used for minimizing hum

### Earth link with spades Earth Connection with Spades for Phono/Turntable

Many customers prefer using their favorite interconnect cable for their phono/turntable setup but still require a reliable ground connection. This grounding cable is designed to complement all our interconnects, including Dual, DAC, EFF, and Sword.

For optimal grounding performance, we use XL Annorum conductors with PP insulation, combined with CombiCon 24K gold-plated copper spades. The CombiCon connectors are crimped under extremely high pressure directly onto the conductor. When done correctly, this creates an airtight, homogeneous, and electrically transparent connection — comparable in many ways to fusion welding.

The conductor is made from multiple strands wound around an insulating core to help minimize skin effect.

Supplied with spade connectors as standard. Banana plugs are available as an option.

### CONSTRUCTION

Conductor:	XL Annorum part 1.6
Gauge:	1x1.6mm <sup>2</sup> / AWG 15
- construction:	12 x 0.4mm OFC wires spun around a PP-core
Insulation:	PP transparent, round
Diameter:	3.0mm
Colour:	Transparent
Plugs:	Combicon spade part M6 & Combicon Body CB02-XL
- Type:	1 Spade > 1 spade, with Sleeve S1-2
- Material:	24K gold-plated OFC
Wire connection:	Crimp
Signal direction:	Not directional
Packaging:	25 x 21.5 x 4.8cm
Special lengths are made upon request.
