SUPRA HDMI-HDMI/H 2.1 UHD8K - Ultra High Speed with Ethernet & Audio return channel. HDMI cables in lengths from 0.5 m to 2 m are assembled with HD5/H cable and are approved for HDMI v2.1 8K/HDR up to 5 m. The HDMI HD5/H is among the best fire-retardant HDMI cables on the market. It supports ultra high-speed HDMI with 100 Mbit/s Ethernet, audio return channel (ARC), and 8K resolution, and has been objectively tested at HDMI's Accredited Test Center in the USA. The cable is fire-retardant and flame-retardant and slightly stiffer than standard HDMI cables. Its low-friction jacket makes it ideal for installation in conduit pipes. The patented, detachable connector housing allows for either a straight or angled connector and enables the cable to be routed through a conduit for concealed installation when the housing is removed. The contact itself is carefully soldered by qualified personnel and encapsulated in durable plastic, ensuring reliable handling even without the housing attached.

The cable can be installed in a 20 mm conduit pipe or, alternatively, a 25 mm conduit hose. The metal connector housing provides 100% shielding after assembly.
