LoRad - Low Radiation
Shielded cord set comprising Supra LoRad 3 x 1.5 mm2 cable, Supra SWF10 female connector (IEC-320) and Supra SW-EU male plug. Current rating 10 A continuously. EU-version, with straight Schuko plug, is the most common standard throughout Europe. Exceptions are Denmark, Italy, Switzerland, Ireland and Britain. Fits our LoRad mains power distribution blocks rated 10A. LoRad means Low Radiation and the design of these mains flex cables minimises both electric and magnetic alternating fields. Allow your hi-fi gear the most welcome benefit of all, the possibility to be silent, when supposed to. Only then, the tiniest details and notes will become clearly audible. LoRad protects both from alternating fields radiating from the cable as well as from pick-up of surrounding airborne noise fields.

- Short pitch twisting of the lead cores cancels the magnetic alternating fields and will not infect adjacent interconnects with noise feedback.
- LoRad will result in a cleaner sound, better picture and a more healthy home and working invironment with low levels of harmful fields.
- The screen protects your equipment from radiated mains, RF pick-up.
