RONDO 4x4.0 COMBICON - Full Range Star Quad

High-quality speaker cable featuring four tin-plated multi-strand conductors, tightly twisted for effective noise cancellation and exceptionally low inductance with higher current capacity. Pre-terminated with our premium Supra CombiCon connectors, the cable allows easy switching between banana/BFA and fork terminations whenever your setup requirements change. The connector body and conductors are high-pressure crimped together to create a perfect, airtight connection for maximum conductivity and long-term reliability.

Ideal for high-powered Hi-Fi systems, longer cable runs, and demanding bi-wire or bi-amplified configurations, as well as professional and stage audio applications requiring higher power handling.
