Sublink 1XLR/F-1XLR/M Audio Analogue Interconnect Cable, Hi-Fi, Line & Subwoofer – Mono
Supra SubLink is designed for single-channel interconnect applications such as active speakers, AV receiver LFE outputs to subwoofer LFE inputs, or as a pair of stereo interconnects. Its low capacitance and highly efficient shielding make it ideal for long cable runs, especially for subwoofer installations. The cable can be connected in either single-ended or balanced configurations using compatible connectors such as RCA-6 or Swift XLR.

An excellent entry-level cable for the conscious hi-fi listener who refuses to settle for the sub-standard interconnects often included with entry-level hi-fi equipment. We believe Supra SubLink is the perfect starting point for discovering the positive impact of Supra interconnects, allowing any hi-fi device to reach its full sonic potential.
