Sublink 1RCA-1XLR/M Audio - Analogue Interconnect Cable – Hi-Fi, Line-Level & Subwoofer (Mono)
 SUPRA SubLink is designed for single-channel analogue interconnect applications such as active speakers, AV receiver LFE output to subwoofer LFE input, or as a stereo pair for high-quality audio interconnections. Its low capacitance and highly effective shielding make it particularly suitable for long cable runs, including subwoofer and active speaker installations.

The cable can be configured for both unbalanced and balanced connections using compatible Supra connectors such as RCA-6 or Swift XLR. An excellent entry-level interconnect for quality-conscious Hi-Fi listeners who demand higher performance than the standard cables typically supplied with entry-level audio equipment. SUPRA SubLink delivers improved signal transparency, tonal balance, and dynamic response, allowing connected audio equipment to perform at its full potential.
