

SUPRA XL ANNORUM COMBICON JUMPER 4X20CM

High-End Bi-Wire Jumper Cable

Gauge: 4x1.6mm² / AWG 15

Rev. date: 2026-06-02

Customs tariff no: 8544499390

Country of origin: Sweden

- Designed to replace standard metal speaker terminal links
- Very low inductance for accurate signal transfer
- Phase-stable connection for bi-wire loudspeakers
- CombiCon M6 system with interchangeable banana and spade connectors

XL ANNORUM COMBICON JUMPER 4X20CM

The SUPRA XL Annorum CombiCon Jumper is a premium bi-wire jumper cable designed to replace the standard metal bridges commonly supplied with bi-wire loudspeakers. Based on the acclaimed XL Annorum conductor technology, it ensures optimal signal transfer between amplifier and driver sections while maintaining phase integrity, timing accuracy, and transparency.

Its low-inductance design and gas-tight crimped SUPRA CombiCon connectors provide a stable, low-loss connection capable of handling high current demands. The included interchangeable banana and spade connectors offer maximum installation flexibility, making it easy to achieve the best possible speaker connection.

CONSTRUCTION

Conductor:	4x24x0.4mm OFC
Cross section area:	4x1.6mm ² / AWG 15
Insulation:	PP transparent, polarity +red/-white
Insulation thickness:	0.7mm
Connectors:	SUPRA CombiCon Crimp M6
Included Terminations:	4 Banana Plugs + 4 Spade Connectors
Connector Material:	24K Gold-Plated Beryllium Copper
Flexibility:	Medium Flex
Colour:	Transparent
Marking:	SUPRA XL ANNORUM 4x1.6 > Made in Sweden > Meter mark
Packaging:	19x18x1cm

ELECTRICAL SPECIFICATION

Resistance:	10.5 ohm/km
Inductance:	0.30 uH7m
Rated voltage:	100V
