SUPRA PPSL RCA - with chuck locking

24K gold-plated RCA contact offering outstanding electrical and mechanical performance. The fully shielded, RFI-resistant construction features a robust design compatible with cables up to Ø7.7 mm.

It includes mechanical cable strain relief and secure attachment to the female chassis connector via a chuck-locking mechanism, ensuring highly effective fixation while remaining gentle on both cables and connectors.

The design incorporates a precision-machined one-piece body, a soldering loop for the negative signal lead as well as the shield drain wire, and PTFE insulation for excellent heat resistance. An aluminum metal jacket, front-mounted, forms an integral part of the chuck-locking system for secure mating with the RCA chassis connector.
